DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on October 4, 2006 has been entered:
 - Claims 1, 6-10, 13, 21, 25, 28, and 33-34 have been amended;
 - Claims 2, 12, 17-20, 24 and 35 have been cancelled;
 - Claims 1, 3-11, 13-16, 21-23, 25-34 and 36 are still pending in this application, with claims 1, 6, 10, 13, 21, 25, 28 and 33 being independent.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
3. Authorization for this examiner's amendment was given in communications with Mr. Douglas W. Rommelmann (Reg. No. 34,418) on November 20, 2006.

Claims

4. Claims 3, 6-11 and 21-23 are cancelled.
5. New claim 37 is submitted as below:

(New) 37. A flashlight comprising:

 - a handle portion having a longitudinal axis;
 - a first member having a first end, a second end and a longitudinal axis, said first end connected to said handle portion; and

a lightbox connected to said second end, said lightbox having a light source for emitting a directional light beam, said light source is swiveable normal to said first member longitudinal axis to direct the directional light beam in various directions relative to said first member,

wherein said handle portion longitudinal axis and a longitudinal axis of said lightbox are substantially parallel with one another and define a hand receiving opening therebetween, said hand receiving opening for receiving a portion of a user's hand, and when said first member longitudinal axis is substantially horizontal, said handle portion longitudinal axis and said lightbox longitudinal axis extend vertically downward.

6. Claim 4, line 1, "1" has been changed to --37--.
7. Claim 25 has been amended as follows:
 - a. line 4, following "and", insert --a longitudinal axis of said handle member being--,
and
 - b. line 9, "in a stationary," has been changed to --stationary and said handle member longitudinal axis is in a--.
8. Claim 28 has been amended as follows:
 - a. line 11, following "plane", insert --and said first longitudinal centerline of said first member--, and
 - b. line 18, following "plane", insert --and said first longitudinal centerline of said first member--.

Reasons for Allowance

9. Claims 4-5, 13-16, 25-34 and 36-37 are allowed.
10. The following is the examiner's statement of reasons for allowance:
11. Claim 37 is allowable because the prior art fails to show or teach a flashlight having a handle portion, a lightbox and a first member placed between the handle portion and the light box:
 - Wherein a light source of the light box swivels normal to a first member longitudinal axis, and a handle portion longitudinal axis and a longitudinal axis of the lightbox are parallel and extend downward in vertical direction when the first member longitudinal axis is in horizontal direction (claim 37);
 - Wherein the handle portion, the first member and the lightbox form a U-shaped configuration (a handle portion longitudinal axis and a lightbox longitudinal axis are parallel), the lightbox has a battery receiving portion with a longitudinal axis, and a light source of the lightbox is movable (90 degrees of rotation) relative to the first member and is oriented in a direction transverse to the longitudinal axis of the battery receiving portion (claims 13, 25); and
 - Wherein a longitudinal centerline of the handle portion (or a longitudinal axis of a battery receiving portion of the lightbox) and a longitudinal axis of the first member define a first plane, a lighting direction of the lightbox is parallel with the first plane and the first member longitudinal axis in a first position, and the lighting direction of the lightbox is transverse to the first plane and the first member longitudinal axis in a second position (claims 28, 33).

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rizzo (US 3,354,570) and Smith (US 6,641,277) show flashlights.
